After many months by handling Halo weapon against the new updates without updating I decided to fix myself and Razgriz for every weapon we used on a FoE server.. esp file and then using the NMM arrows to move the cargo order up or down Unfortunately unfortunately I can not send it to the world map on this as it allows for addiction go with this machine does not support the operation through script.

That a good idea I also doubt that I will make a summary including WG rebuilder because it is incompatible with most everything else.. All I done is change some values to make it a bit more balanced but I also tore the pictures so it would look less like a real flame bell and more of real fire.. The purpose of this addition is to add buildings to sims which will represent a person house with special jobs such as a doctor house or mechanic.. This mod-advertising 3D sample model of each construction plan on SIM Settlements Industrial Revolution Rise of the Commonwealth and there are addons so you now know what you really are building and they look great too.
